

A guide to change the firmness of your **Premium Adapt Mattress**

(Previously Mattress Plus)

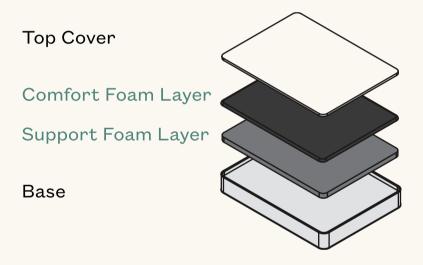

Life is better together.
Please assemble with
two people.

Your mattress comes with 3 firmness levels out of the box.

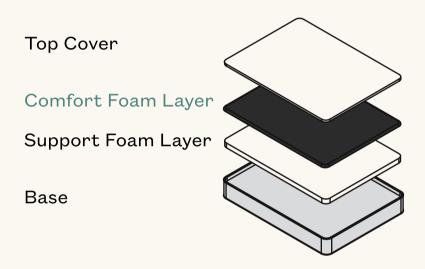

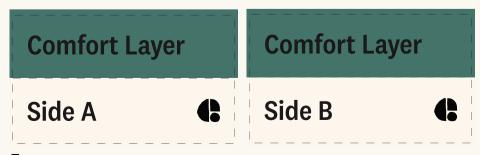

Customise your mattress by rearranging the two inner foam layers to achieve different firmness levels.

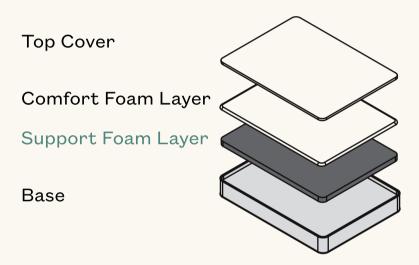

Note: Please refrain from pulling the foam layers out of their mesh covers as they are difficult to put back on.

The Comfort layer can be flipped to have either Side A or Side B facing up.

The Support layer has its own inner cover. Both sides are the same.

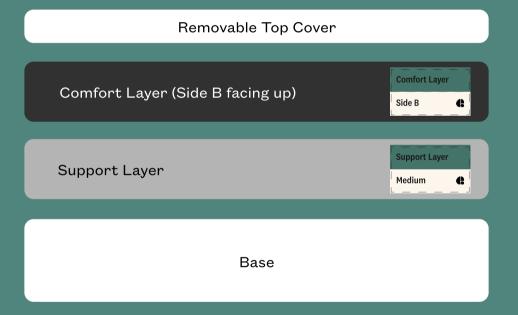

Note: The Premium Adapt Mattress comes with the Support layer in a medium firmness setting.

Soft (default)

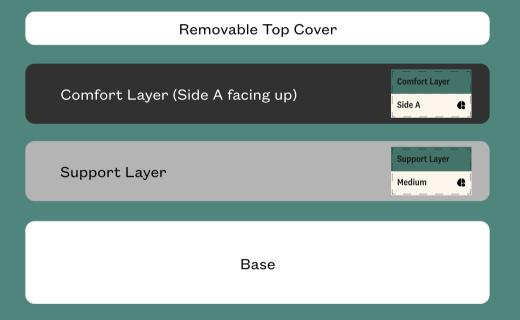

Your mattress will arrive in the following configuration.

Medium

To configure the medium level, arrange the foam layers as below.

Watch the assembly video here.

Firm

To configure the firm level, arrange the foam layers as below.

Watch the assembly video here.
