

A guide to your

SLIDEAWAY SIDE TABLE

What's in the box

4 key parts

1 x Top clamp

1 x Bottom clamp

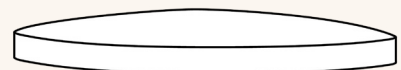

1 x Hand screw

1 x Steel Table Top

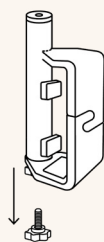

1 x Timber Top (optional add-on)

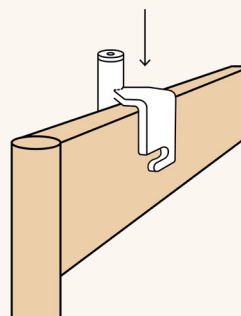

STEP 1

Remove the hand screw so the top and bottom clamps come apart.

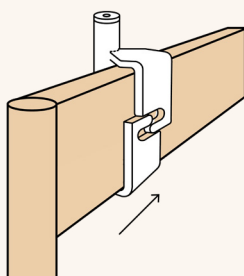

STEP 2

Place the top clamp over your Slideaway armrest. The tube should face the outside of the arm.

STEP 3

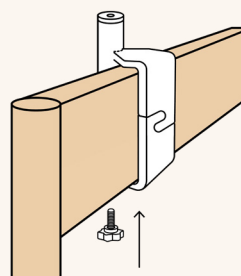

Slide the bottom clamp into the slot of the top clamp.

STEP 4

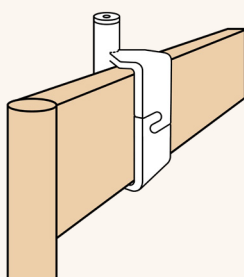

Insert the hand screw through the bottom clamp tube.

Tip: Press your thumb on the tube while you line up the hole — it makes the next bit easier.

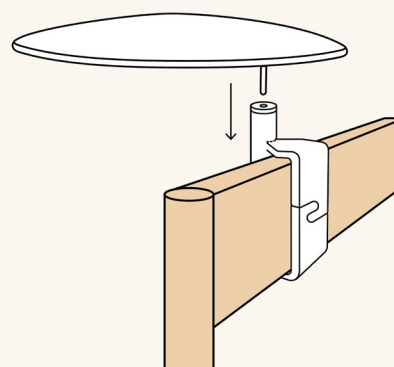

STEP 5

Tighten the hand screw until the clamps are snug, with no gaps. That's how you know it's locked in.

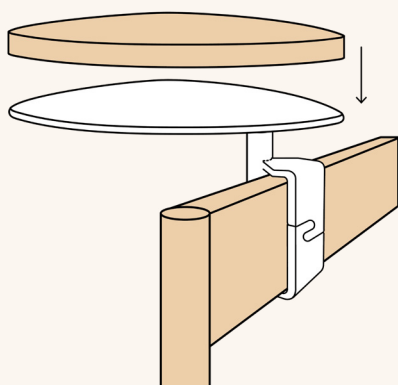

STEP 6

Drop the table top rod into the clamp tube to secure it in place.

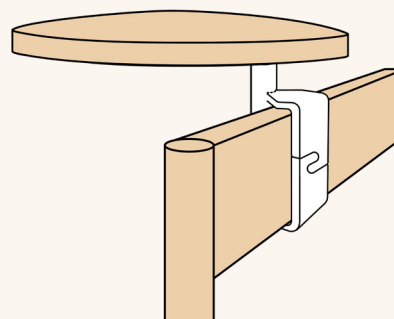

STEP 7

If you chose Timber Line up the timber top with the steel base — magnets will do the rest.

THAT'S IT

Your Slideaway Side Table is ready for snacks, laptops, books, or whatever else life throws at it.

Enjoy your

SLIDEAWAY SIDE TABLE
